Exchange Technology, a division of Financial Technologies (India) Ltd., simplifies the trading and settlement of Multi Asset and Multi Currency products, to enable the world's leading exchanges to seamlessly operate in cross border markets.

Financial Technologies is among the global leaders in offering technology IP (Intellectual Property) with domain expertise and strong techno functional teams to create next generation financial markets that are transparent, efficient and liquid to address the growing business challenges.

Our end-to-end seamless exchange system known as Exchange Technology Framework Product Suite (ETFPS) is a highly versatile, scalable and robust system that covers all aspects of exchange operations right from the trading to settlement. ETFPS is driven by strategic and operational needs to deal with cost & margin pressures, ever changing business environment and regulatory compliance among others.
