

Financial Technologies empowers Reliance Life Insurance with STP-Gate™.

RELIANCE
Life Insurance
Anil Dhirubhai Ambani Group

www.reliance-life.co.in

“The multiple files uploading facility provided by STP-Gate helps Reliance Life Insurance make effective and hassle-free equity trades. STP-Gate is a user-friendly product that enables us to directly upload response files to STP-Gate. We expect the same kind of services from the Financial Technologies team in future.”

Rupesh Lalwani
Manager Treasury and Fund Accounting
Reliance Life Insurance

Client

Reliance Capital Limited, one of the leading private sector financial services companies in India, ranks among the top three private sector financial services and banking companies in terms of net worth. Reliance Capital offers fully integrated financial services in asset management, mutual funds, stock broking, life and general insurance, proprietary investments, private equity, and other activities in financial services and aims to become a dominant player in the financial industry.

Reliance Life Insurance is another step forward by Reliance Capital to offer need-based life insurance solutions to individuals and corporate executives.

Business Needs

- **User-friendly and Simplistic System**

STP-Gate, with its unique feature of bulk contracts, can meet the requirements of Reliance Life Insurance and help the company with a cost-effective system that enables it to send responses to multiple contracts at a click of mouse.

- **Flexible Solution with Multiple Options**

The back-office system of Reliance Life Insurance is compatible with the ISO file formats and can generate response files as per the ISO 15022 format. Therefore, with the multiple upload facility available with STP-Gate, Reliance Life Insurance can directly upload response files to STP-Gate by using either of the two options—bulk contracts or upload—depending on their volumes and other dependant processes. The multiple files uploading facility helps the company in efficient performance with minimal dependencies.

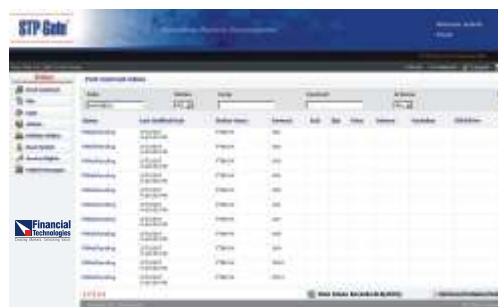

Benefits

- User-friendly
- Non-dependency on other systems for ISO file generation, as one can send responses through the Web site
- Flexibility to use different options
- Success/failure status for all the files uploaded. In case of a failure, a reason for the failure is provided

STP-Gate™

STP-Gate is a robust, secure, and straight-through-transaction processing platform that provides online interface among fund houses, custodians, and brokers, based on ISO 15022 messages. STP-Gate provides online secure connectivity to STP market participants, along with online status and message flow.

STP-Gate has an elite clientele comprising of over 150 investment managers, over 350 trading members and 100 percent of the leading custodians, including a few FIIs, sharing their patronage with Financial Technologies and attaining the no. 1 position in the STP services.

STP Enhanced Products

STP-Gate has designed a basket of products that take into consideration various market participants and their requirements. Using STP-Gate Adapters, various market participants can optimize operational efficiency and reduce manual intervention.

- STP-DIMEX
- STP-Proficient
- STP-Navigator
- STP Matching System

Benefits

Risk Mitigation and Reduced Process Time

Online status update and information availability reduce process time and risk in comparison to the scenario, where clients would have to call each other to confirm their obligation status.

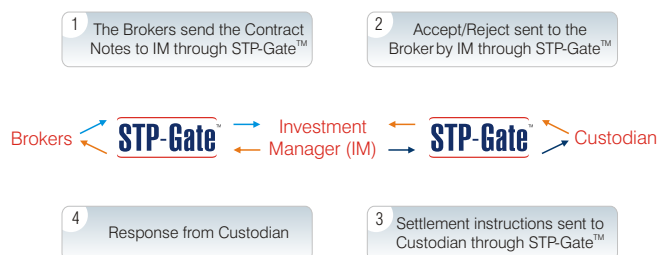

Increased Automation

Seamless flow of information in an electronic format and the use of digital signatures help increase automation and efficient operations. You do not need paper-based document management.

Interoperability

The implementation of standardized multiple messaging formats and software, by using a centralized hub, leads to immense time and cost advantage for end-clients.

STP-Gate™ Flow

Complete and Secure Connectivity

STP-Gate offers continuous connectivity of different entities for communication. This allows a real-time message flow among different entities under a fully 128-bit SSL secure network.

Financial Technologies (India) Limited, the flagship company of the Financial Technologies Group, is among global leaders in offering technology IP (Intellectual Property) and domain expertise to create and trade on next generation financial markets that are transparent, efficient, and liquid across all asset class including equities, commodities, currencies, and bonds.
